

(NOTE 1,3)

The diagram illustrates the vertical assembly of the IRP-1201 instrument. At the top, there is a flange-like component with two small rectangular features. Below this is a large, hollow cylindrical section. A horizontal line extends from the right side of this section. In the center of the cylinder, there is a smaller rectangular component. Below this, a solid black circle is positioned between two vertical lines. Further down, there are two more rectangular components, one on each side of the central axis. At the bottom of the main assembly, there is a U-shaped component with a dashed line indicating a gap or opening. Below the main assembly, there are two vertical columns of four small squares each, representing additional structural elements or mounting points.
