1) INTRODUCTION

Binak oilfield in Bushehr province is a part of the southern oilfields of Iran, is located 20 km northwest of Genaveh city. With the aim of increasing production of oil from Binak oilfield, an EPC/EPD Project has been defined by NIOC/NISOC and awarded to Petro Iran Development Company (PEDCO). Also, PEDCO (as General Contractor) has assigned the EPC-packages of the Project to "Hirgan Energy - Design and Inspection" JV.

GENERAL DEFINITION:

The following terms shall be used in this document.

CLIENT: National Iranian South Oilfields Company (NISOC)

PROJECT: Binak Oilfield Development – Manufacturing (w/Engineering & Material Supply) of Gas Dehydration Package.

EPD/EPC CONTRACTOR (GC): Petro Iran Development Company (PEDCO)

EPC CONTRACTOR/PURCAHSER: 10int Venture of: Hirgan Energy - Design & Inspection Companies (HE/DI)

VENDOR: iDrill Middle East (iDrill M.E)

Purpose:

The purpose of this technical document is to provide the Mechanical Calculations for Elevated Potable Water Tank.

2.2.3.1.3 ASTM A283, grade A steel is to be used only for nonstructural items such as clips, roof sheets, and other low-stressed components less than 1 in. (25 mm) thick. Grade B and C shell plates are limited to a thickness of 1 in. (25 mm) when tension stress governs and 1 ½ in. (38 mm) when compression stress governs. Grade D shell plates are limited to a thickness of ¾ in. (19 mm).
